

```
package main.java.Test1;

public class MySample {
    public MySample(){
        System.out.println("MySample is loaded by"+this.getClass().getClassLoader());
        //由加载MySample的类加载器来加载MyCat类,并且符合双亲委派
        new MyCat();
    }
}
```
